

FP-VRT-1000 Hands Free Telephone: Programming Guide

Installation

1. Connect two black leads to phone button on COP. (already wired by CJA)
2. Connect phone jack to incoming phone line.

Programming Your Telephone

1. From another phone, dial the number of the ADA phone.
2. ADA phone will come on line after one ring.
3. When ADA phone comes on line, wait five seconds and enter security code 1,2,3,4,5,6.
4. Enter primary number to be called from ADA phone, followed by #0,0
5. You should hear two beeps.
6. Enter secondary number followed by #0,1.
7. You should hear two beeps.
8. Enter *4 to start voice message recording. You have 10 seconds to record message. Pushing any key stops the recording.
9. Enter ADA phone I.D. number followed by #2,0.
10. Hang up. Your ADA phone is now programmed.

Definitions

Primary Number is the first number that you want the ADA phone to dial when button is pressed.

Secondary Number is the second number that you want the ADA phone to dial if the first number is busy or does not answer.

Voice Message is the vocal message you want the ADA phone to announce to the receiver of the emergency call.

I.D. Number is the number selected by the customer to identify the location of the ADA phone. This number will appear on a DM-4 monitor located at the receivers phone.

Security Code is a select series of numbers identified by the phone to access programming procedures. Security code 1,2,3,4,5,6 is a factory setting.
